WHY AMC?

AMC is a dynamic, growing company that was founded in 2005 and will be around for years to come. We take great pride in our craftsmanship and feel that we provide a truly premium product. We have gone to great lengths to ensure that our doors are, and will remain solid and secure by using an engineered stile for added rigidity and strength. Our moldings are produced in a state of the art machine that results in an amazing finished product. We use only the finest quality woods that have been kiln dried and graded to very high standards, this is how we are able to produce the wide variety and very distinctive custom designs we specialize in. Our facility is state of the art and we continue to incorporate new technology, equipment, and services. Every door we build goes through a multi-step, quality process and is examined and worked on by multiple, specialized, skilled craftsmen; this ensures our quality is never accidental. Quality is the name of the game and you will find it in every product we produce; whether it's custom hardwood moldings or custom doors, we won't settle for less than the best.

INTEGRITY

We pride ourselves in being dedicated to our customers and fulfill our promises. If we can't meet a specific schedule, we'll tell you that up front. No hot air, no surprises. Our goal is to please every customer beyond their expectations.

CUSTOMIZATION

Want something specific, just for you? We offer custom doors- turning your dreams into beautiful reality. We believe that quality woodworking and great design go hand in hand. In addition to doors, we offer custom moldings to meet everyone's specific needs. We have the ability to grind our own molding knives allowing us to custom match existing profiles, or simply create one that will be unique just to you.

VALUE

What about value? We have the ability to turn your house into a home with our beautiful handcrafted doors and moldings, giving your home a beautiful richness not attained any other way. Our goal has always been to produce the highest quality products from the finest materials while providing extraordinary customer service each and every time at an outstanding value.

WARRANTY

AMC will warranty each solid door produced from the AMC facility for a period of one year from the date of shipment to the jobsite. Warranty is limited to good material and workmanship free from defects that would render a door unserviceable or unfit for ordinary, recommended use. In the event of failure or defect, AMC will at it's discretion, repair the door without charge or provide a replacement door without charge in the same state as it was originally purchased from AMC.

HANDLING OF HARDWOOD DOORS

All New doors should be handled with care and protected from the weather. Prior to the doors being finished is the most critical time as they are most susceptible to absorbing moisture which can cause twisting and/or warping. Doors that are pre-hung should never be stacked flat, they should be in a controlled environment where there are minimal swings in temperature and humidity, and every door should be finished within 48 hours from time of shipment to the job site. An unfinished door will start to absorb moisture immediately and this will affect it's integrity and void it's warranty.

FINISHING

Doors must be finished on all surfaces, uniformly, with a minimum of three coats of finish suitable for wood. All six sides of a door (Both faces, both edges, top and bottom) as well as any cut outs and bored holes for hardware should be finished. All wood doors expand and contract depending on the temperature and humidity. Finishing the doors on every surface allows the door to acclimate to humidity swings as well as temperature expansion/contraction at a much slower rate. Allowing the door to change slowly will greatly reduce the total amount of movement the door will experience. When doors are installed, an acceptable amount of allowance should be made for the change in dimension that will undoubtedly occur.

EXCLUSION OF WARRANTY

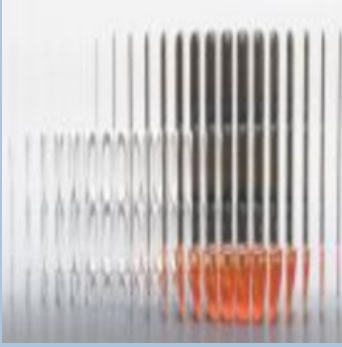

The following are not defects in workmanship or material and will not be covered under warranty.

Improper installation, natural variation in color or texture, knot size shape or placement, surface checking of oak, failure to properly seal/maintain the door, damage caused by improper handling or on site storage, improper overhang for exterior doors direct exposure to sunlight or moisture will affect the integrity of the wood, panel misalignment or shrinkage, doors present before mudding taping or painting, modifications of any kind to the door this includes trimming distressing and removal of any piece of the door.

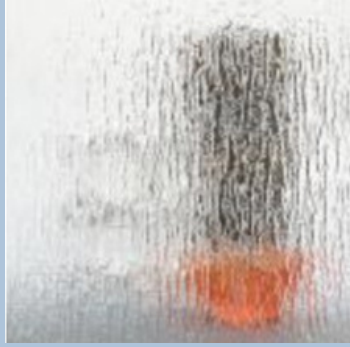

Glass

Any of our doors can be customized to have unique panel profiles or cope and stick which is a decorative molding that goes around the panel. V grooves and Kerf lines are also something we are able to offer. We can also replace any panel with glass, clear or patterned.

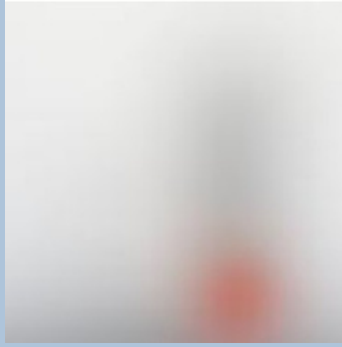

Our Glass Types

Reeded Glass

Rain Glass

Satin Etch

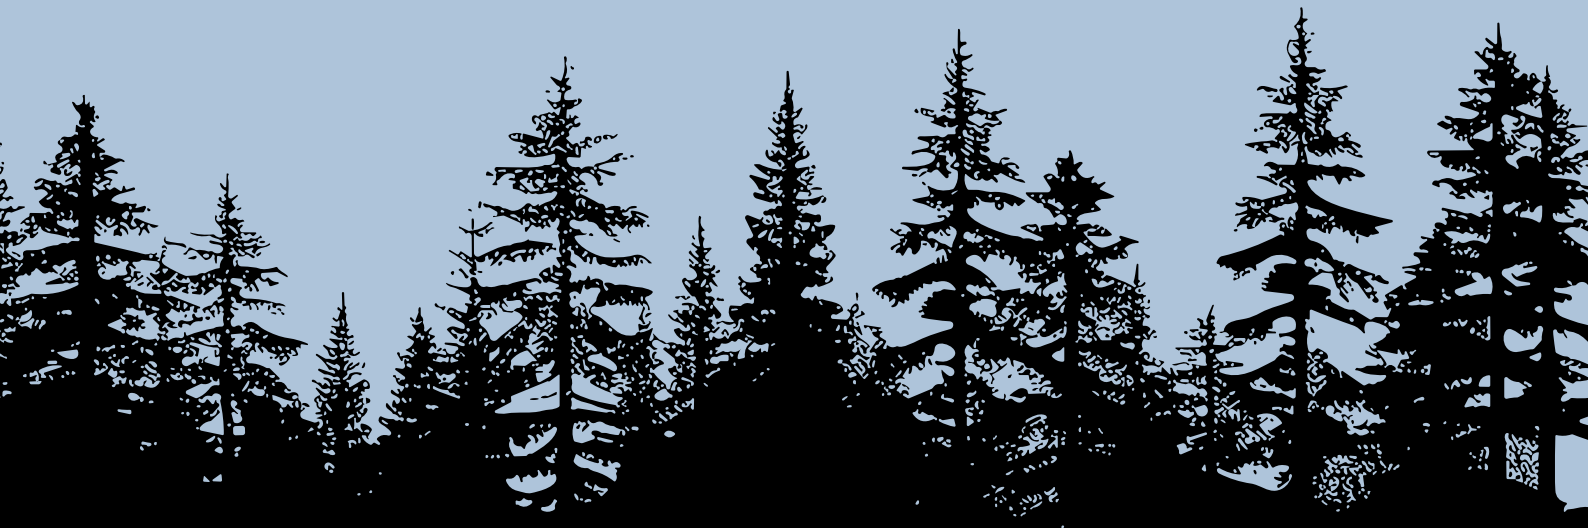

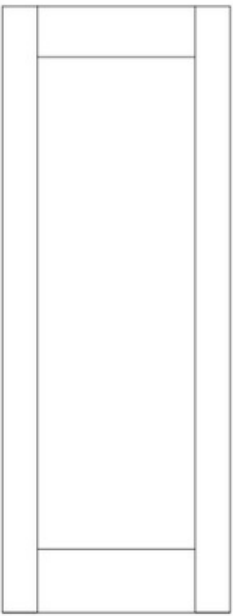

Flemish
